

FLI DSS

PCCF, ODISHA

**Forest Land Information &
Decision Support System**

USER MANUAL

User Login page:

1. Open the web browser (chrome, Firefox... Etc) and enter the URL -**odishaforestgeodss.in**, it will open the FLI DSS web portal as shown in below picture (Picture -1.0).

2. In Home page of the web-portal there is a login form, a register user can login to the web-portal by their respective credential (user ID and Password), if the credential valid then the user will redirect into dashboard.

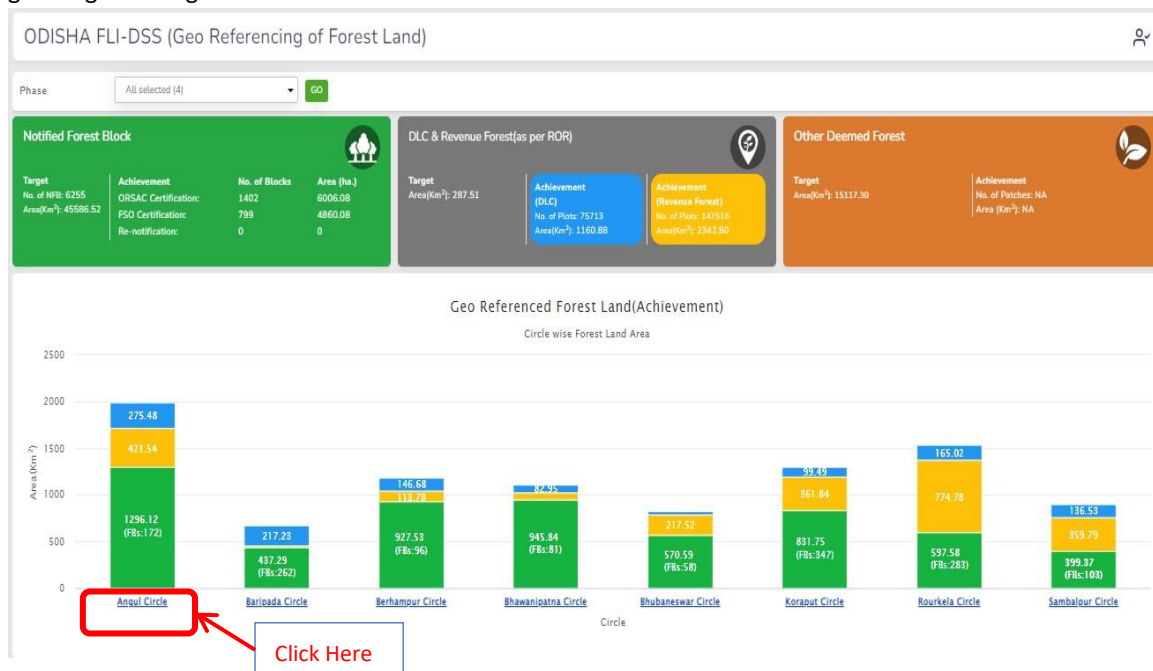

(Picture -1.0)

Dashboard:

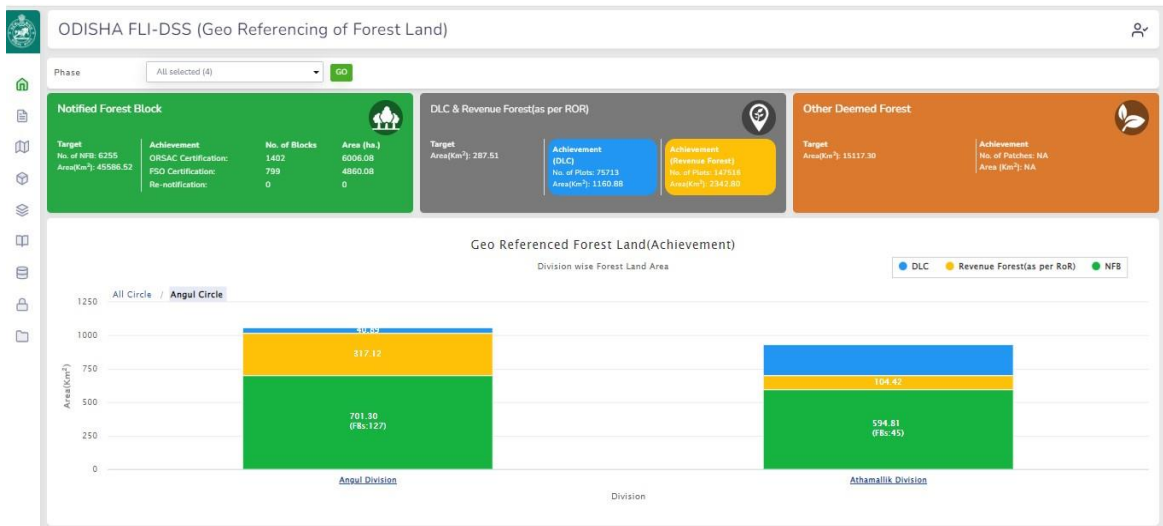

After successfully login the user will redirect to the Dashboard as shown in the picture below (Picture -2.0).

Dashboard contain Phase wise Target vs Achievement data in the form of charts. The charts consist of a Circle wise Target vs Achievement data of Notified Forest Block, Recorded Forest Area, and Other Deemed Forest. By Clicking on any Circle, you will get division wise Target vs Achievement data and like that by clicking on division you will get range wise figure.

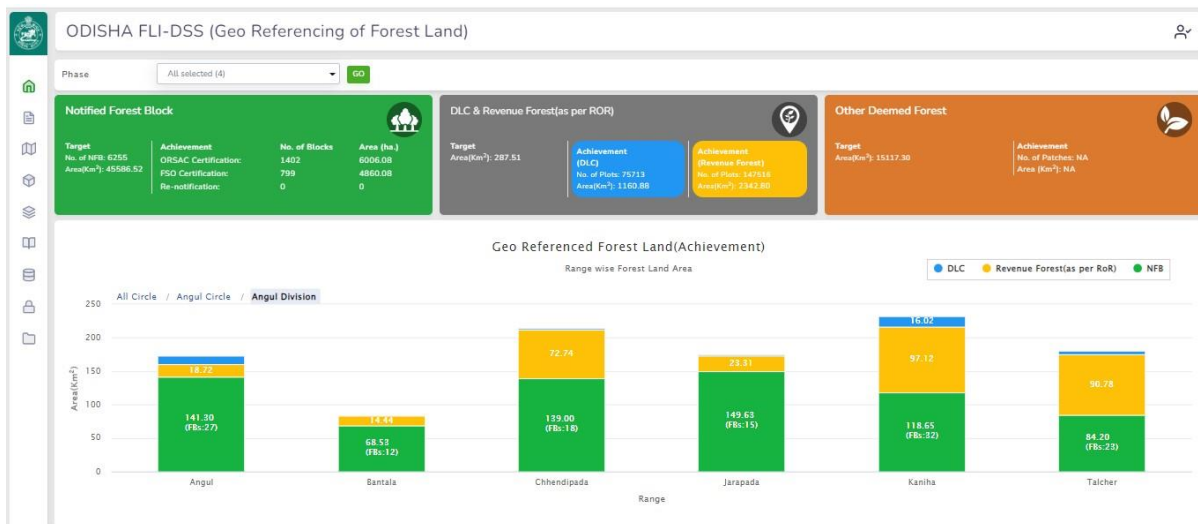

(Picture -2.0)

Click on a **circle** (as shown in picture - 2.0) then the chart drill down to respective division of that circle and it will show all division wise data (as shown in picture - 2.1)

(Picture -2.1)

Click on a **division (as shown in picture - 2.1)** then the chart drill down to respective range of that division and it will show all range wise data (as shown in picture - 2.2)

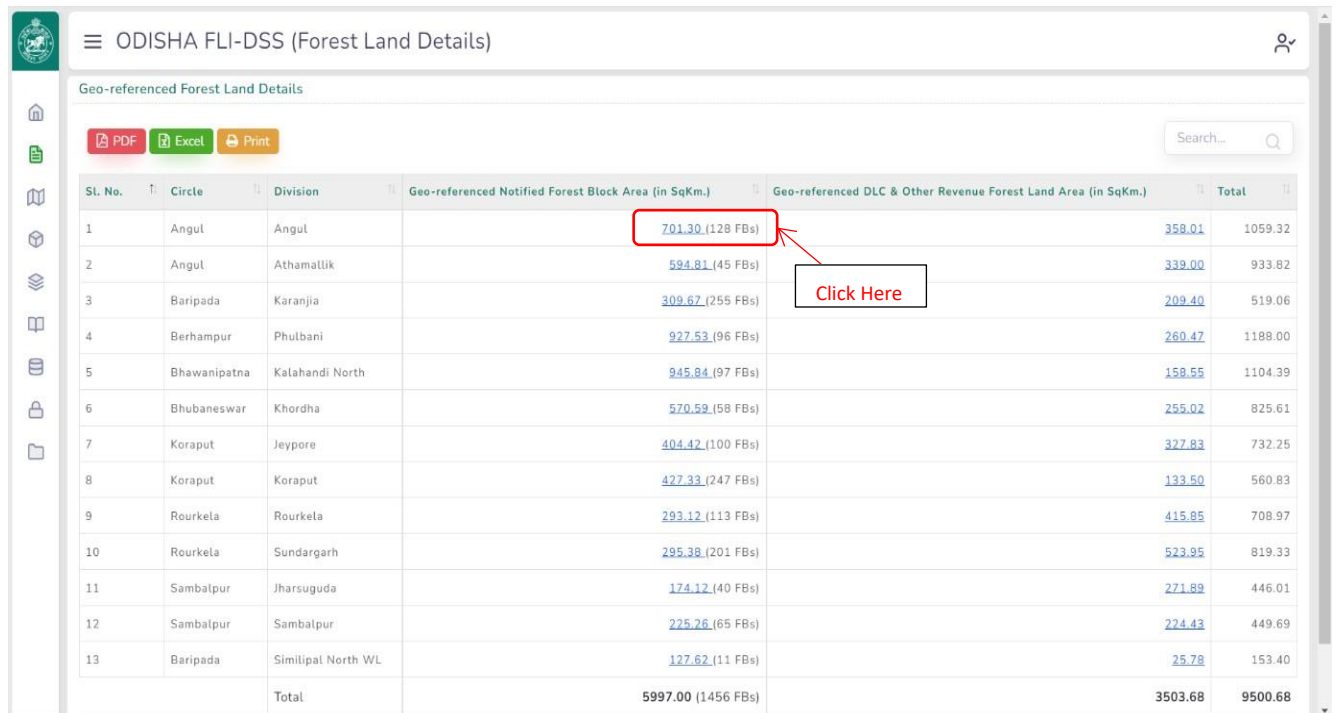

(Picture -2.2)

Forest Land Details:

Forest land details contain the division wise *Notified Forest Block Area* and also you will get the individual forest block wise Notified area, FRJVC report, FSO certified Map, Re notification Proposal reports.

Tahsil, Village, plot wise ***DLC Revenue Forest Land Area*** are also available along with the certified DLC and Revenue copy.

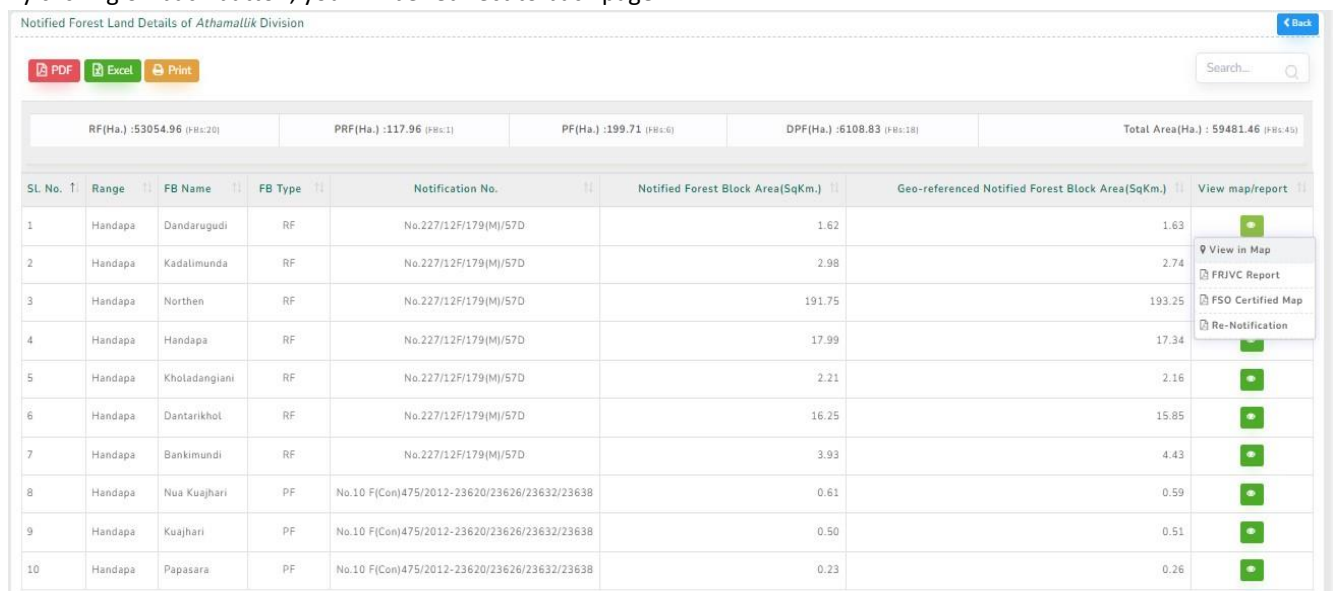

Sl. No.	Circle	Division	Geo-referenced Notified Forest Block Area (in SqKm.)	Geo-referenced DLC & Other Revenue Forest Land Area (in SqKm.)	Total
1	Angul	Angul	701.30 (128 FBs)	358.01	1059.32
2	Angul	Athamalik	594.81 (45 FBs)	339.00	933.82
3	Baripada	Karanja	309.67 (255 FBs)	209.40	519.06

11	Sambalpur	Jharsuguda	174.12 (40 FBs)	271.89	446.01
12	Sambalpur	Sambalpur	225.26 (65 FBs)	224.43	449.69
13	Baripada	Similipal North WL	127.62 (11 FBs)	25.78	153.40
Total			5997.00 (1456 FBs)	3503.68	9500.68

(Picture -3.0)

When you are going to Forest land details page you will get division wise total Notified Forest Area as well as DLC Revenue Land Area of all divisions as shown in above picture (Picture -3.0).

Click on a Notified Area of division as shown in above picture (Picture -3.0), you will get individual forest block wise data as shown in picture (Picture -3.1). Click on eye icon present in right side of table, a menu will be open containing (View in Map, FRJVC, FSO Certified reports and Re-notification proposal reports), by clicking on individual reports you can view that reports in new tab.

By clicking on back button, you will be redirect to back page.

(Picture -3.4)

There will be a Map View icon as shown in picture (Picture -3.4), by clicking on that you can view that plot information in map as shown in picture (Picture -3.5) and by clicking on that plot you can view the plot information in a popup window.

Forest Land Information:

1. Interactive Map UI based platform for generation of relevant Forest Information through Query/ Reporting services, GUI based geoprocessing of Forest data layers along with the Map data sources such as SoI Topographic maps, Forest Cover Maps, High Resolution Satellite Imagery.

2. Map Viewer

- Selection of specific forest/ overlay data layers from each groups as per the analysis/ reporting requirements to display the selected data layers on map viewer
- User interaction with the Map Viewer through Map tools for retrieval of Forest Information
- Display of attribute information of selected map features in Information Window

- Facilitates toggling between the Map Viewer and Data Viewer to interplay between the map view and data view of the same data set.

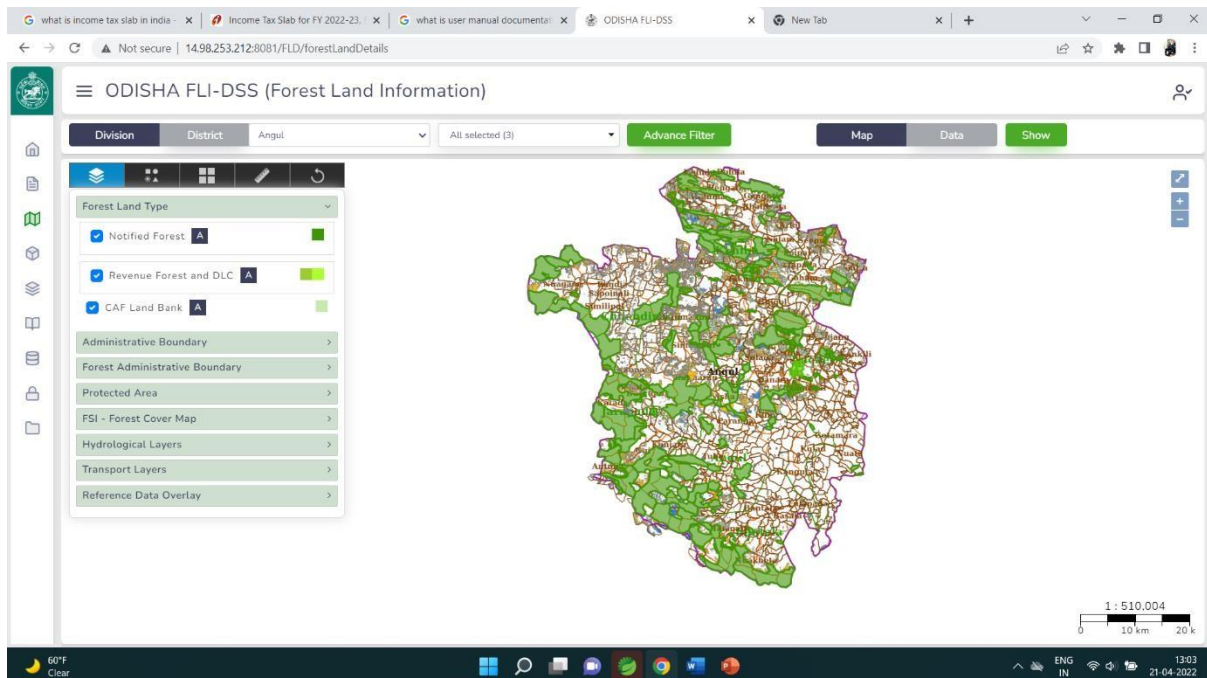

3.Map Tools

- Extent/ Pan/ Zoom/ Navigation: Facilitate manoeuvring of map layers displayed on the Map Viewer
- Base Map Tool: facilitates selection of Base Map
- Measurement: interactive measurement of distance and area on map
- Information Window: Display of Attribute Information of the selected Map layer

4.FLI module generates forest land information through geo processing of the Forest land database and related forest data sources.

5.ToC represents the Forest land/ Overlay data layers in multiple logical groups such as

- Forest land type (*NFB/ DLC & Other Revenue Forest/ Deemed Forest/ Diverted Forest/ CAF Forest*)
- Revenue Admin boundary (*District, Tehsil, Block, Village*)
- Forest Admin boundary (*Division, Range*)
- Protected Area boundaries (*Sanctuary, National Park, ESZ, WL corridor, Conserv.Rsv*)
- FSI Forest Cover Maps layers
- Hydrology layers (*Rivers, Reservoirs*)
- Transport data layers (*Road, Railway*)

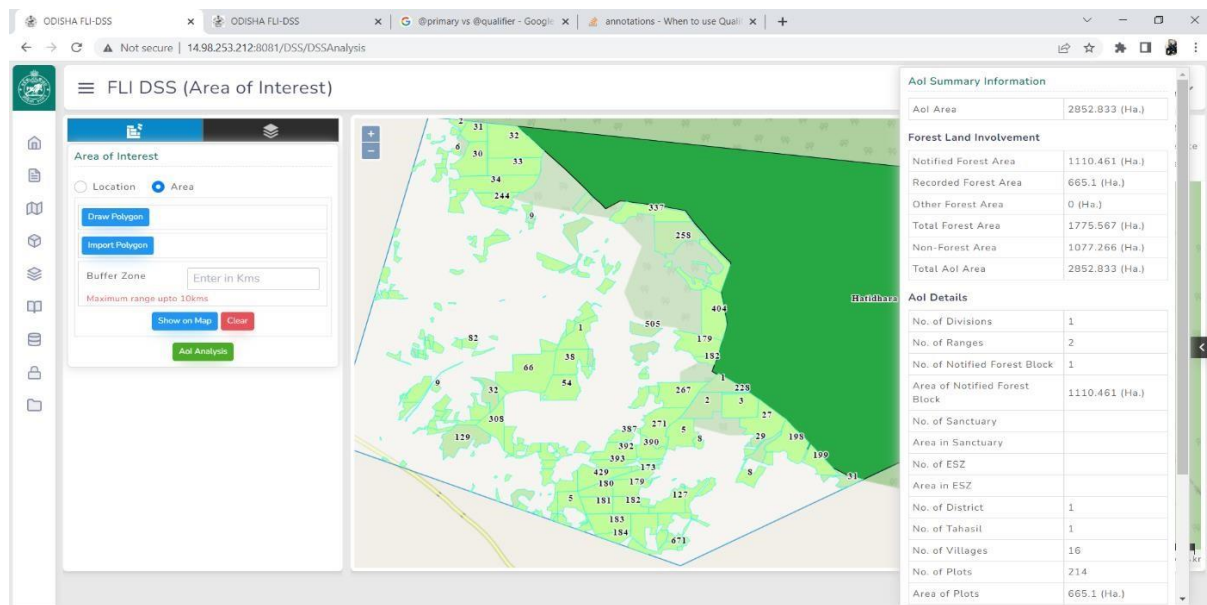

6. As you can see the above picture of layers, we have selected some persist layers of Angul Division.

7. There are also two options you get one is **MAP** and another is **DATA** as a button. As shown on the above screen, it's upon map.

8. Below screen is about the Data, when you click on data button to view the selected division or district data

accordingly.

Custom Query:

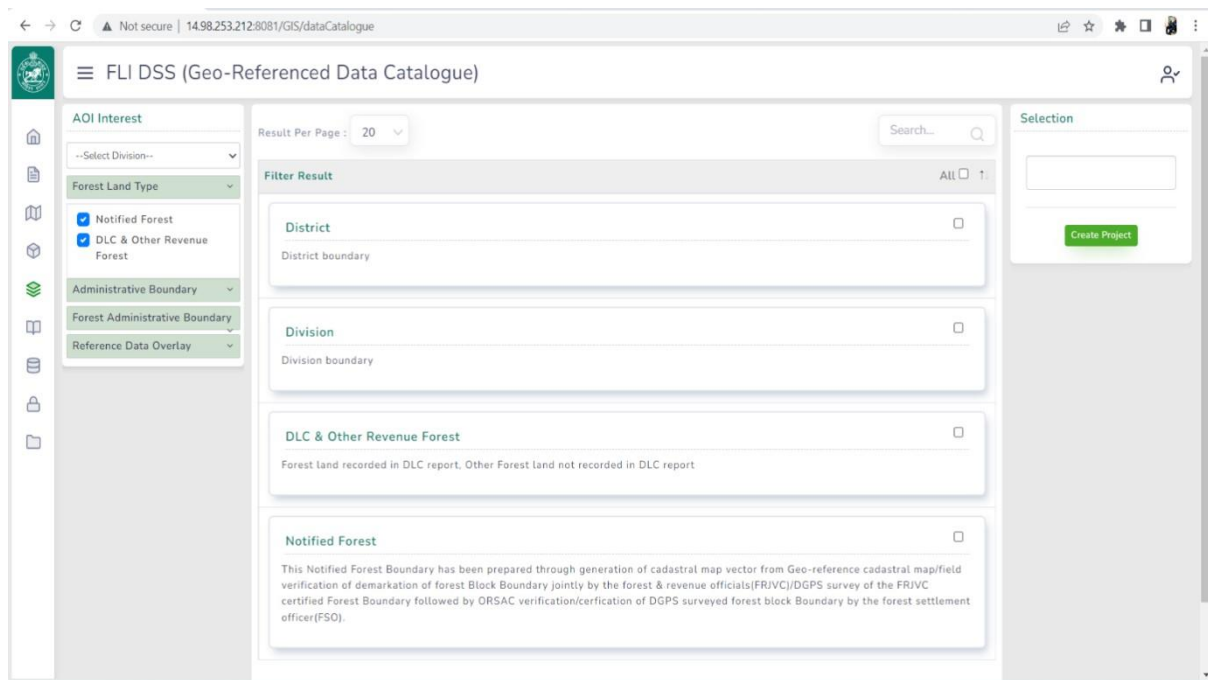

GUI based Query Builder to facilitate input of query definition through Interactive UI and generation of attribute-based query results in Tables formats. Here we can select fields and get all information about the fields and gets information of Division or District, Range or Tehsil, NFB or Village based on selected fields. It is same as like as Forest Land Information and print them.

Query Results Table:

Sl No	Division	Range	FB Name	NFB Type	Notified Area(Ha.)	DGPS Area(Ha.)	Map View
1	Angul	Angul	Kalaput	PRF	1,202.364	1,282.348	
2	Angul	Angul	Kerjang	PRF	498.590	355.859	
3	Angul	Angul	Kumanda-Talataila	RF	55.671	55.154	
4	Angul	Angul	Kurudu	PRF	842.585	876.082	
5	Angul	Angul	Madhapur	RF	229.870	217.077	
6	Angul	Angul	Malibrahmani	RF	154.284	154.029	
7	Angul	Angul	Nisha	RF	610.692	630.709	
8	Angul	Angul	Paranga	RF	258.199	315.601	
9	Angul	Angul	Pokunda	PRF	375.562	366.541	

Geo-Referenced Data Catalogue

- Data catalogue facilitates data preview & selection of forest data layer, attributes w.r.t user requirements
- Logical grouping and organization of Forest data layers in TOC
- Category of Forest Lands
- Revenue Administrative Boundaries
- Forest Administrative Boundaries
- Reference Data Overlay (SOI toposheet, FSI FC, HRSI etc.)
- Selection of Data layers from the TOC
- Map view of selected data layers along with layer description.
- Selection & bundling of Forest data layers/ Overlay data layers and creation of Project for further reference and data analysis

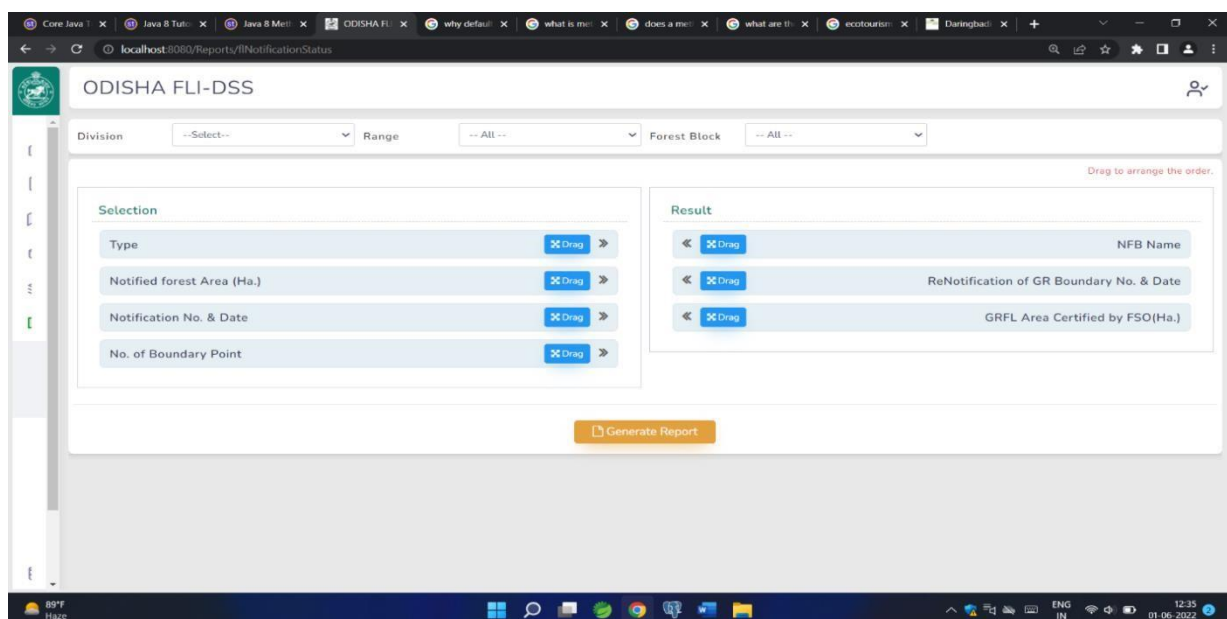

REPORTS:

In report section the given features are to generate Report according to custom column,

It has 3 sub modules: --

- Forest Land Notification Status
- NFB Custom Report
- Notification Reports

1. Forest Land Notification Status

- By selecting the drop down according to division, range and respective forest block, after you can go for the selection of custom report column (basically you can organise them by dragging into the right-side result box).
- After organising the column, you are ready to generate the Report, so to click **generate Report button** to let the report generate.

2. NFB Custom Report

The screenshot displays the 'ODISHA FLI-DSS (NFB Custom Reports)' web application. At the top, there are dropdown menus for 'Division' (set to '--Select--'), 'Range' (set to '-- All --'), and 'Forest Block' (set to '-- All --'). Below these is a 'Drag to arrange the order.' instruction. The main area is divided into two columns: 'Selection' and 'Result'. The 'Selection' column contains several categories with items and 'Drag' buttons: 'Notification Info' (Type, ReNotification of GR Boundary No. & Date, No. of Boundary Point), 'WP Info' (WP Year, WP Area (Ha.), NFA - MMVA (Ha.), (NFA - MMVA) % Difference), and 'CMV Info' (CMV Area (Ha.)). The 'Result' column shows a list of items that can be dragged into the report, including 'NFB Name', 'Notified forest Area (Ha.)', 'Notification No. & Date', 'GRFL Area Certified by FSO(Ha.)', 'Range', 'Division', 'MMV Area (Ha.)', 'NFA - JVA (Ha.)', 'DGPS Survey Area (Ha.)', and 'New Pillar'. At the bottom right, there is a green 'Generate Report' button.

- As we mentioned in above report likewise, you can organise the report column accordingly.
- Here you can generate the report by clicking the button generate report after clicking it a pop up will open then you can mention the appropriate custom report name. (As the inserted below picture).

This screenshot shows the same 'ODISHA FLI-DSS (NFB Custom Reports)' interface, but with a modal dialog box open in the center. The dialog is titled 'Enter a report title' and contains a text input field with the placeholder 'DSS Report Title'. Below the input field are two buttons: 'Close' and 'Save changes'. The background interface is dimmed, showing the 'Selection' and 'Result' sections as described in the previous image.

3.Forest Land Type Summary

The screenshot shows the 'ODISHA FLI-DSS' interface for generating a Forest Land Type Summary report. At the top, there are dropdown menus for 'Division' (set to '--Select--'), 'Range' (set to '-- All --'), and 'Forest Block' (set to '-- All --'). Below these, there are two main sections: 'Selection' and 'Result'. The 'Selection' section contains four items: RF, PRF, PF, and DPF, each with a 'Drag' button and a right-pointing arrow. The 'Result' section contains two items: 'Division Name' and 'Range Name', each with a 'Drag' button and a left-pointing arrow. A 'Generate Report' button is located at the bottom center. A small red text 'Drag to arrange the order.' is visible in the top right corner of the main content area.

- So likewise, you can generate this report accordingly as following the above reports.

Progress Monitoring: 8

The Progress Monitoring module contains the information about Joint Verification and DGPS Survey details contains the FRJVC and FSO certified pillar details along with co-ordinate, Pillar Type, Photographs and other survey information of that pillars.

It has two parts

- FRJVC Details
- DGPS Details

FRJVC Details

FRJVC means Forest Revenue Join Verification Committee

The screenshot shows the 'ODISHA FLI-DSS (FRJVC Details)' interface. At the top, there are dropdown menus for 'Division' (set to 'Angul') and 'Range' (set to 'Angul'). There is an 'Advance Filter' button and 'Show' and 'Reset' buttons. Below these, there are buttons for 'PDF', 'Excel', and 'Print'. A search bar is located on the right. The main part of the interface is a table with 15 columns: Sl No, NFB Name, NFB Type, Notified Area(Ha.), Start Date, Last Date, Existing Pillar, Proposed Pillar, Total Pillar, JV Perimeter (Km.), JVA(Ha.), Difference (JVA-NFA), JV Report Submitted Dt., FRJVC Clearance Date, and Action. The table contains 10 rows of data. At the bottom, there is a pagination bar showing 'Showing page 1 of 13' and a set of navigation buttons.

Sl No	NFB Name	NFB Type	Notified Area(Ha.)	Start Date	Last Date	Existing Pillar	Proposed Pillar	Total Pillar	JV Perimeter (Km.)	JVA(Ha.)	Difference (JVA-NFA)	JV Report Submitted Dt.	FRJVC Clearance Date	Action

6	Derjang-Golabandha (P)	RF	166.160	03-12-2019	03-12-2019	13	33	46	5.830	160.970	-5.190	26-06-2020	25-08-2020	
7	Guranga	RF	49.778	28-09-2020	28-09-2020	16	7	23	2.910	55.186	5.408	13-10-2020	25-01-2021	
8	Hinsar Sorishpal	PRF	779.048	17-10-2020	16-11-2020	116	20	136	16.500	780.832	1.784	05-01-2021	25-01-2021	
9	Jukub	PF	4.860			0	11	11	0.970	4.874	0.014	04-12-2020	25-01-2021	
10	Kalapat	PRF	1,202.364	03-10-2020	17-11-2020	123	44	167	20.090	1,284.997	82.633	05-01-2021	25-01-2021	

- In the table at the last column which is action column at there a eye button is present so why you click on that button you will see 3 options by which you can manipulate the record of data.

- Those 3 options are
 - View pillar details
 - Map view
 - FRJVC Report
- When you click on this option a new page will open, where you can see a table of data.

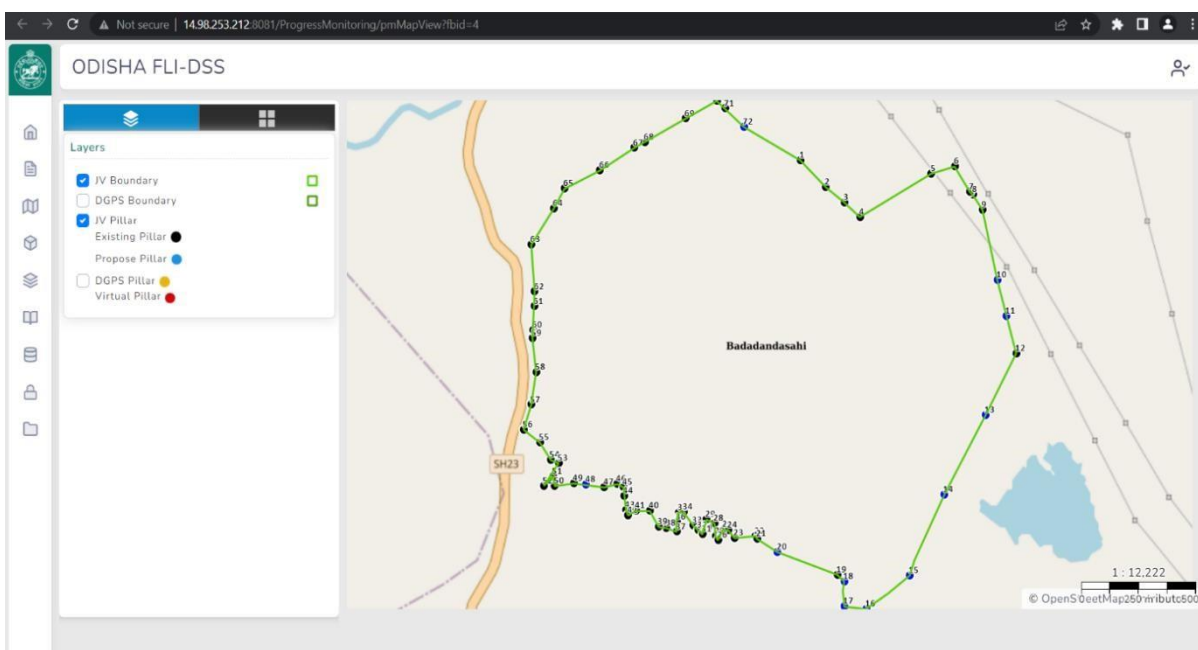

ODISHA FLI-DSS (FRJVC Details)

Map view:

- On click of this option you will redirect to a page, where you will find the map which consist of pillar and boundary.
- There you can the layer according to the given options on the left slid.

FRJVC Report

- Basically, when you go for this option, you will find the related PDF document.

DGPS details: --

- Here you will find DGPS related NFB name, Area, FRJVC certified area, ORSAC clearance date etc. information based on select Division or District and Range or Tehsil.
- In action, we get Pillar details and Map view of that selected Area.

- Also, we can download or print that information.
- If we do not select any fields then it shows all total information of Default Division.

- **Portal Administration: --**
- It has 7 sub module such as
 - Position Creation
 - Role Creation
 - User Creation
 - Global Link
 - Primary Link
 - Set Role and Permission
 - Set User wise position

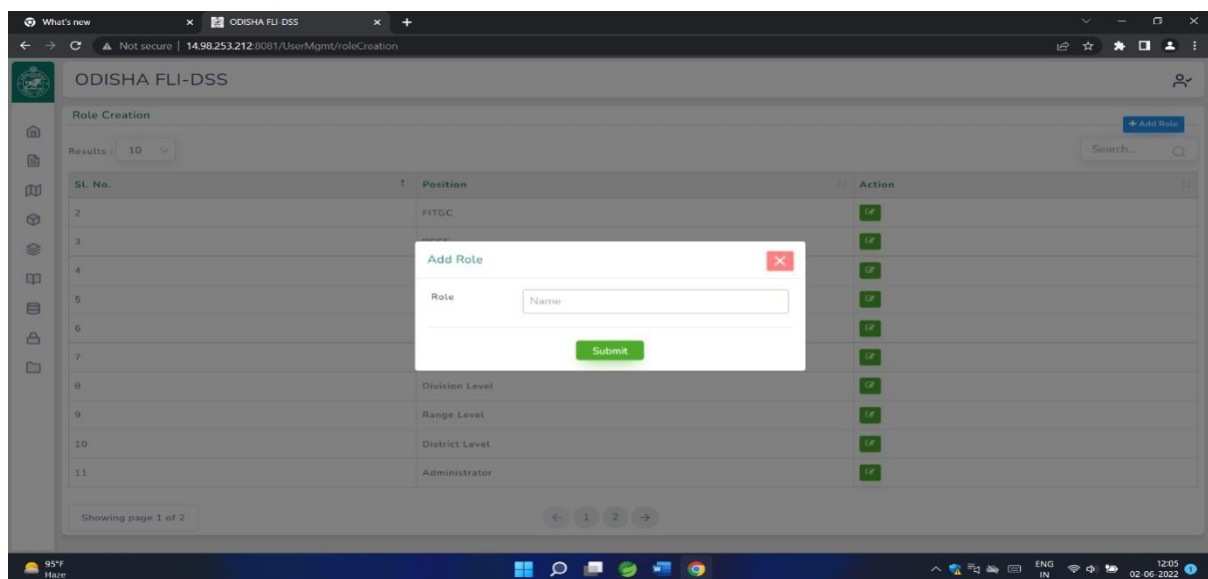

Position Creation:

- By this option you can create a position of a user by clicking the **add position** button on the right top then it will open a pop up for add and also you can edit the role and position accordingly by given edit button.

Role Creation:

- In this option you can add Role of a user by clicking the **add Role** button on the right top then it will open a pop up for add and you can edit the role accordingly by given edit button.

User Creation:

- Here you can create a User according to their role and position and etc, by clicking the **add user** button on the right top it will open a pop up as shown in below then you can fill the form then hit the submit button.

The screenshot shows the 'User Creation' page of the ODISHA FLI-DSS system. A modal window titled 'Add Role' is open, allowing users to assign roles and positions. The modal contains the following fields:

- Role:** A dropdown menu currently showing '--Select--'.
- Position:** A dropdown menu currently showing '--Select--'.
- Name:** A text input field with the placeholder 'Name'.
- Email:** A text input field with the placeholder 'Email'.
- Mobile No:** A text input field with the placeholder 'Mobile No'.
- Circle:** A dropdown menu currently showing '--Select--'.
- Division:** A dropdown menu currently showing '--Select--'.
- Range:** A dropdown menu currently showing '--Select--'.
- District:** A dropdown menu currently showing '--Select--'.
- Tehsil:** A dropdown menu currently showing '--Select--'.

A green 'Submit' button is located at the bottom of the modal. In the background, the 'User Creation' form is visible with 'Role' set to 'Administrator' and a blue '+ Add User' button in the top right corner.

- Also, you can search the user by their role and position for activate and deactivate the use for need and you can edit the user by clicking the edit button as shown in below.

The screenshot shows the 'User Creation' page with search filters applied: Role is 'Administrator' and Position is 'FITGC'. A green 'Search' button is visible. Below the filters is a table listing the users.

Sl. No.	Name	Role	Position	User ID	Contact No	Status	Action
1	Baijayanti Behera	ORSAC	Verification Team	baijayantibehera18@gmail.com	9692899338		

Global Link:

- You can add global link by providing all the requirement in the form.
- You can Edit it and update it by given **edit action** button and you can active and inactive it.

Set Role and Permission:

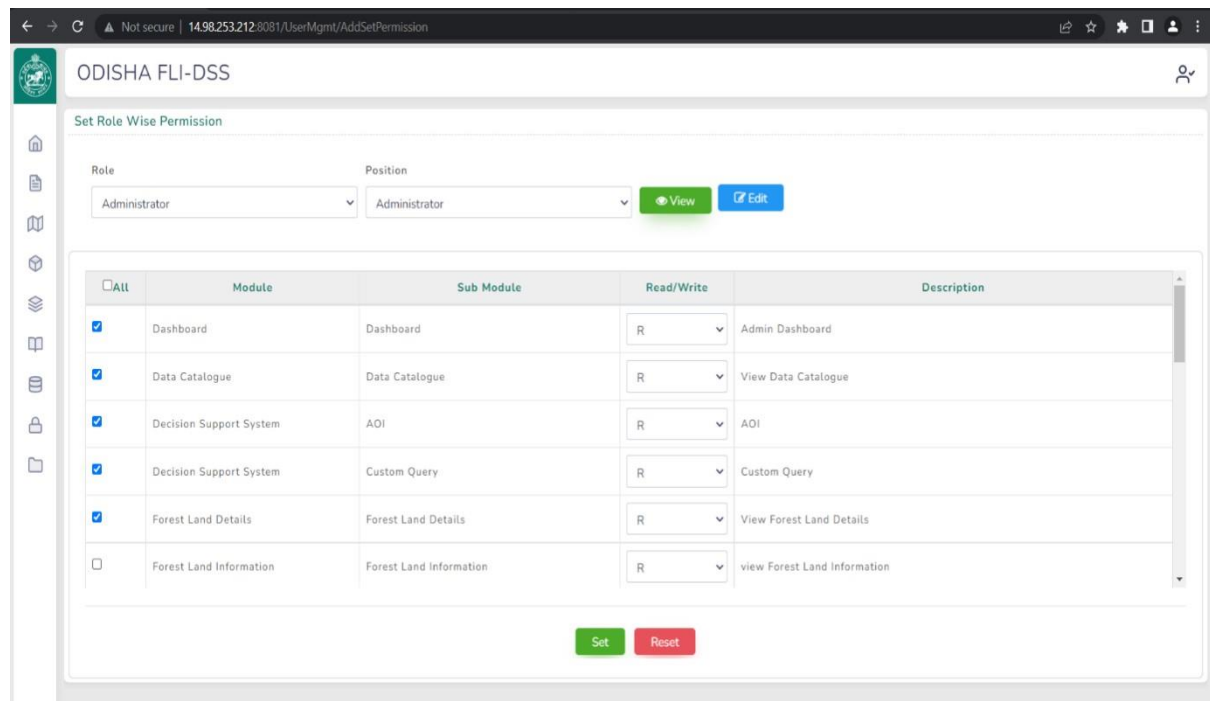

Step-1

- You can give role wise permission to the user where they have the access level in the application by configuring.
- You need to search them by role and position wise then it will show a list of link name as shown below

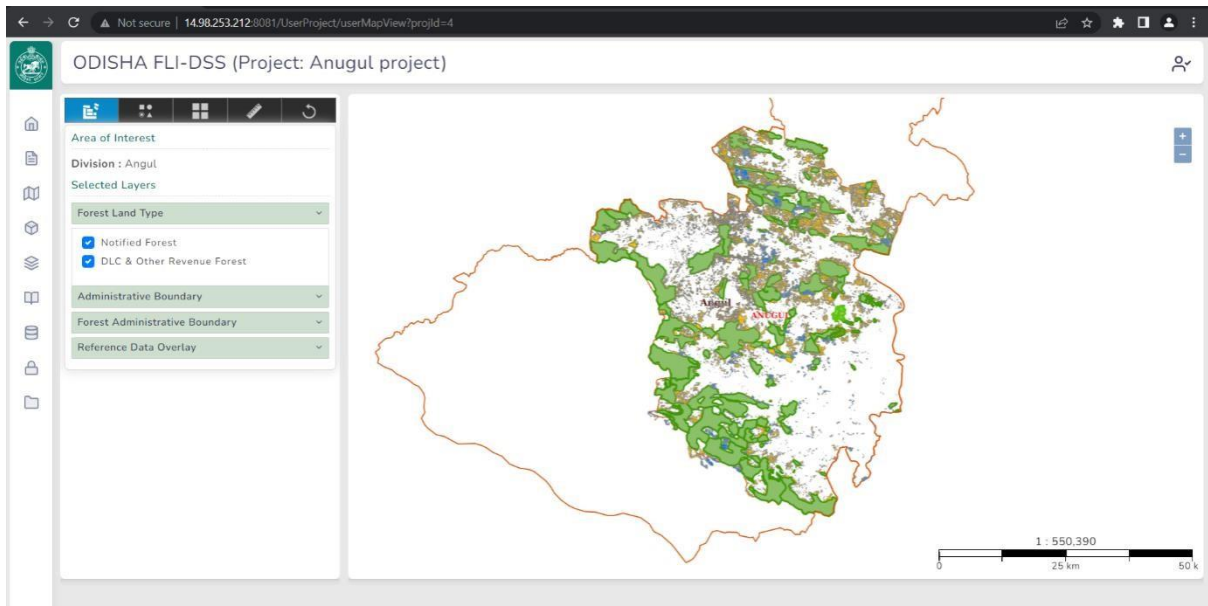

Step-2

- Then you can edit those by clicking the edit button then you will redirect into another page for edit as shown below

My project:

- It is the part of the data catalogue module.
- In data catalogue you simply create a project by taking different kind of layers.so that project reflect here means you can verify or can see you own made project here.
- For example, we are taking Angul project.

Thank You!!
